# COMPUTER LITERACY AND DIGITAL SKILLS FOR CHILDREN OF UNDERSERVED COMMUNITIES

There are still millions of people in India that neither have access to nor can afford computer literacy and skills to better their lives. The government schemes are mostly available online, which people from poor communities are unable to access. To bridge the digital gap, IDRF in partnership with Computer Shiksha provides Computer Literacy and Digital Skills at schools for underserved children who can use technology for the betterment of their lives in every possible way.

At present, 135,000+ students from underserved communities in 18 states of India are benefitting from computer classes at 780 schools. To take computer literacy and digital skills to more underserved children, we need your help. Your donation will provide participating low-budget schools in semi-urban/rural areas with refurbished computers and parts, hardware, and software support, course content, teachers' training, manuals, assessment services, certification, etc.

---

## **A. One-time: Setting up of computer lab in one school**

**(Hardware, computers, training of instructors, etc.)=\$1,500**

**B. Recurring: Providing computer literacy for 1 year/school=\$700**

**Total cost:**

**Set-up of Lab & Computer Literacy for one year/school=(A+B)\$2,200**

*NOTE: For cost and efforts efficiency, the minimum number of schools undertaken as a single project is 10 schools per territory*
